C2K - CROCODILE WALL EXTENSION PROFILE

The UK's most popular solution to the tying-in of new walls to existing masonry walls/columns. The only system with "snap out" ties which can be positioned anywhere along the channel for a universal fit. The C2K **Crocodile Wall Starter is** a quality engineered wall connector system that has been developed for use with most brick and block modules. This system has been designed for multipurpose use where reliability and durability are important requirements. It provides lateral support to masonry wall panels in conversion, extension and new building work.

C2K BBA Agrement Certificate

FEATURES

Material

- Stainless Steel Profiles: Austenitic stainless steel.

INSTALLATION

Installation

- Use all specified fasteners.
- Fasteners must be spaced evenly, unless otherwise specified, and installed into the bricks or block and not into mortar joints.
- Insert wall ties provided at maximum 300mm centres, bedding the ties into the mortar joints.
- Detailed site work instructions are provided with each wall connector system.
- In exposed locations it may be necessary to incorporate additional protection, for example the insertion of a vertical dpc.
