

## Straightaway 700 Residential Sliding & Folding Door Systems

### Door Specifications

- Maximum Door Weight: 115kg
- Door Thickness: 30-60mm
- Door Construction:  
Width one third height minimum, handle height three fifths from bottom for best results. When fully open, the sliding panel should project a minimum of 65mm to avoid fingers becoming trapped between handle and fixed panel. Suitable for doors of normal timber-framed construction, panelled, glazed or framed.

- Maximum Door Height: 2400mm

- Top Channel Dimensions:  
25mm (w) x 25mm (h)

### Hardware Specifications

- Aluminium top channel soffit fixed, drilled and countersunk for woodscrews
- Bottom tracks drilled and countersunk for woodscrews

- Top track surface mounted or recessed, floor tracks surface mounted or recessed
- For single, bi parting or bi passing doors
- Aluminium rattle proof top guides with brush welt
- Die cast casings on rollers, nylon wheels with needle bearings ensure smooth operation even on heavy doors
- Components also available in stainless steel

# Straightaway 700

## Residential Sliding & Folding Door Systems

### Product Overview

Straightaway 700 is a bottom rolling sliding system. It is suited to applications such as patio doors and large internal and external sliding doors. It is a reliable and hardwearing system that can be used where there is not sufficient overhead support for a top hung system.

### Technical Specification

Article No.	Description	Image
